Club Management System - API & Role Reference

This document defines the core data models and role-based access rules. It is intended for both developers (API implementation) and clients (functional clarity).

Purpose: Define roles, permissions, and governance for club operations.

User Roles & Permissions Overview

Super Admin (Coach)

Full control over players, tournaments, and admin management.

- Full CRUD on Players & Tournaments
- Can create/demote Admins
- System-level authority

Admin (Assistant Coaches)

Operational access without deletion or role control.

- Create, view, update Players & Tournaments
- No delete access
- No admin management

Security : Role-based login, controlled permissions, and action tracking.

Players Module

FIELD	DATA TYPE	DESCRIPTION
id	UUID	Unique player identifier
name	String	Full name
age	Integer	Age
age_group	String	Age category (U13, U15, etc.)
gender	Enum	Gender(Male / Female)
size	String	Jersey size
height	Float	Height (cm)
weight	Float	Weight (kg)
jersey_no	Integer	Jersey number
address	String	Address
city	String	City

REST API Endpoints

GET /api/tournaments
POST /api/tournaments
GET /api/tournaments/{id}
PUT /api/tournaments/{id}
DELETE /api/tournaments/{id} (Super Admin only)

Tournament Module

FIELD	DATA TYPE	DESCRIPTION
id	UUID	Primary key
name	String	Tournament name
age_group	String	Age category
status	Enum	Upcoming / Ongoing / Completed
start_date	Date	ISO-8601
end_date	Date	ISO-8601
location	String	Venue / City
images	Array<String>	Image URLs

REST endpoints

GET /api/tournaments
POST /api/tournaments
GET /api/tournaments/{id}
PUT /api/tournaments/{id}
DELETE /api/tournaments/{id} (Super Admin only)

User & Role Module

FIELD	DATA TYPE	DESCRIPTION
id	UUID	User ID
email	String	Unique
password	String (hashed)	Never store plain text
role	Enum	SUPER_ADMIN / ADMIN
image	String	Profile image URL

REST endpoints

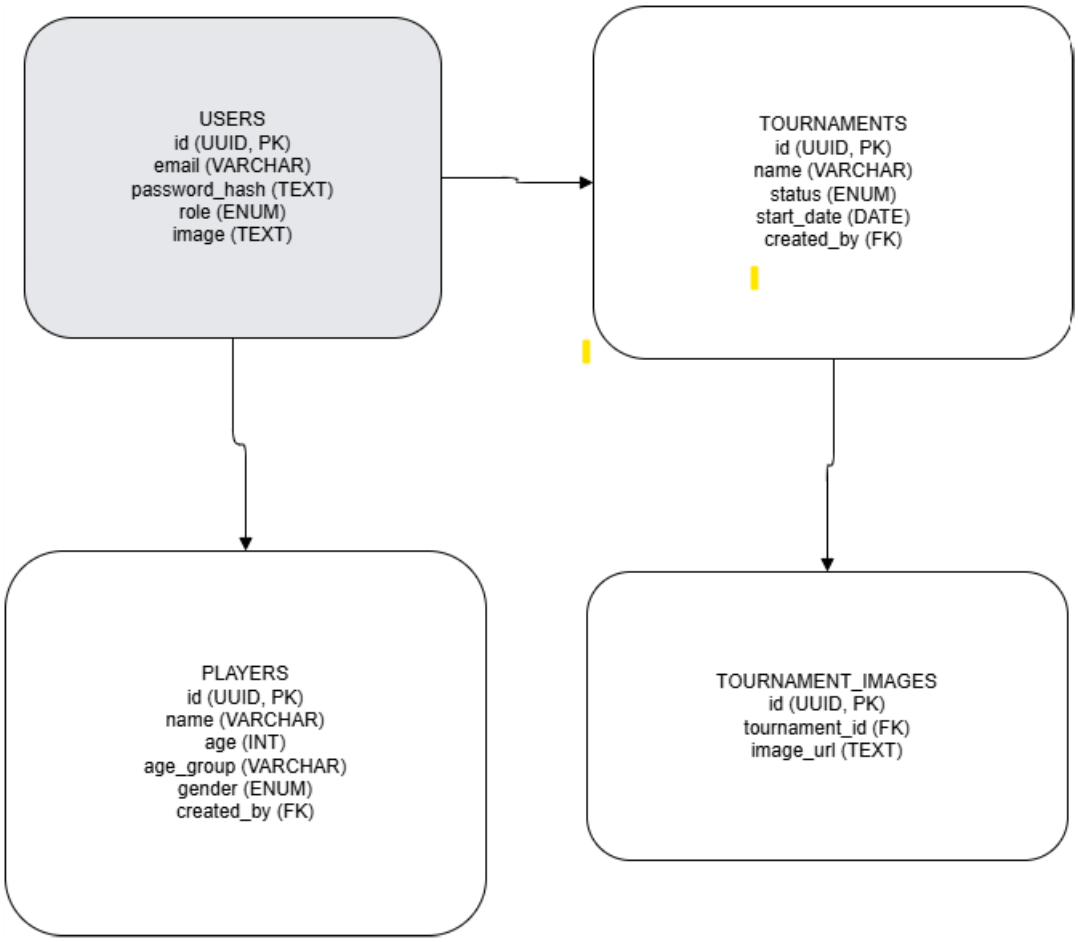

POST /api/admins
PUT /api/admins/{id}/demote

Feature Comparison

FEATURE	SUPER ADMIN (COACH)	ADMIN (ASSISTANT COACH)
player_management	Create / Read / Update / Delete	Create / Read / Update
tournament_management	Create / Read / Update / Delete	Create / Read / Update
admin_management	Allowed	Not Allowed
delete_access	Yes	No
system_authority	Full Control	Limited Control

This role-based access system ensures secure delegation, prevents accidental data loss, and supports scalable club operations.
Included Scope: Role-based authentication Player & tournament management Admin hierarchy and governance Future role extensibility

SQL Schema

USERS
id (UUID, PK)
